

TAIMOOR AHMAD

Full Stack Web Developer

+923014841580 | taimoor220297@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience building scalable SaaS platforms using Ruby on Rails, Node.js, React.js, and PostgreSQL. Strong background in API architecture, distributed systems, and cloud deployments. Recently focused on AI-powered applications including LLM integrations, RAG pipelines, AI chatbots, and developer workflow automation using Python. Passionate about building intelligent tools that enhance productivity and product capabilities for global teams.

PROFESSIONAL EXPERIENCE

Stack Hub | Senior Ruby on Rails Developer

February 2023 - Present

- Led full-stack developer, architected, and engineered a SAAS platform.
- Implemented a secure and seamless Stripe payment gateway integration.
- Developed a secure authentication system using the Devise gem.
- Efficiently automated deployment on Render, reducing manual deployment time by 60%.
- Developed RESTful API's to support seamless communication with mobile application.
- Provided continuous support, resolving bugs and issues to maintain optimal functionality.
- Spearheaded the creation of a new API/v3 version of the backend, enhancing compatibility with third-party applications. Utilized Swagger for comprehensive API documentation.
- Upgraded Node.js packages and Ruby gems, ensuring the application's security and performance.
- Engineered innovative features that led to a remarkable 20% reduction in user response time.
- Implemented websocket and client-websocket for seamless communication between third party API and front-end.
- Built AI-assisted development workflows using LLM APIs.
- Developed internal AI chatbot prototypes using Python and LLM APIs.
- Implemented Retrieval Augmented Generation (RAG) pipelines for contextual knowledge search.

Fleet Apps | Ireland | Ruby on Rails Developer

July 2022 - February 2023

- Successfully integrated third-party APIs such as Stripe and Driver-Check.
- Provided expertise as DevOps and managed deployments on AWS Lightsail while overseeing the s3 bucket and EC2 server.
- Ensured GDPR compliance with a focus on secure user data protection and removal.
- Streamlined fine creation services, boosting financial penalty management efficiency by 70%

Coding Cops | Pakistan | Software Engineer

September 2020 - July 2022

- Built responsive websites using HTML, CSS, SCSS, and javascript, ensuring optimal viewing experience across different devices.
 - Worked on 3rd Party integrations like Recaptcha, Intercom and Launch Darkly
 - Introduced a trial feature to restrict trial-based user access to specific application functionalities and a SignUp Trial module, simplifying the process of granting access to new users and businesses, reducing the marketing team's workload by 20%.
 - Conducted debugging and troubleshooting to improve overall stability and performance. Assisted in quality assurance by conducting thorough testing and bug fixing.
 - Revamped the product website using Webflow for a modern and improved user experience.
-

SKILLS

Backend: Node, Ruby on Rails, PostgreSQL, GraphQL, RESTful APIs, RSpec, Redis, SQLite, Flask

Frontend: React JS, AngularJS, JQuery, JavaScript, Bootstrap, HTML, CSS, SCSS, Typescript

DevOps: Ec2, Amazon s3, AWS Lightsail, Render, CI/CD

Other skills: Github, Git, Jira, Stripe, Webflow, SaaS Development, RAG Pipeline, AI Chatbots, Prompt Engineering
